

Code Elements Rendered as Images

The following examples show code blocks rendered via the internal Render API as PNG images with syntax highlighting.

1. Python function (centered, dark background)

```
def calculate_total(values):  
    total = 0  
    for value in values:  
        total += value  
    return total  
  
print(calculate_total([1, 2, 3, 4]))
```

2. JSON configuration (right aligned, light background)

```
{  
  "name": "Json2doc",  
  "version": "1.0.0",  
  "features": [  
    "pdf",  
    "docx",  
    "render-api"  
  ]  
}
```

3. SQL query (image with auto-detected language)

```
SELECT id, name, created_at  
FROM users  
WHERE created_at >= &#x27;2024-01-01&#x27;;  
ORDER BY created_at DESC;
```
